

Mobile Frac Tank: Single Axle

Mobile fluid storage suitable for fracking, hydrotesting, drilling or mining operations

Capacity: 68,000litre
Height: 2.9m
Width: 2.5m
Length: 13.9m
Weight: 12,700kg

Approximate size

Advantages

1. Efficiency

- Fast moving with integral hydraulic lifts eliminate need for a winch truck or tilt tray
- 8" manifolds allow multiple tanks to be manifolded together for larger jobs

2. Safety

- Flip down Australian Compliant Stairs with extendable handrails on stairs
- Fully registered and ADR compliant

3. Environment

- 8" Frac manifold with master valve provides dual isolation to prevent spills
- Lift cylinders run off electric motor powered by solar panel eliminate need for refuelling a diesel powered hydraulics

Specifications

- Front outlets: 8" Frac Manifold with Master Butterfly valve, 2x 8" Weco Hammer Unions, 2x 4" Camlock outlets with Butterfly valves and 2x 4" Weco outlets with Butterfly valves. Multiple tanks can be manifolded together for large frac jobs.
- Rear outlets: 1x 4" Weco and 1x 4" Camlock outlets. 4" Drain Line to sump allowing cleaning and sucking dry.
- 1x 4" FMC/Weco style gel/gun line connection with 4" valve in front of tank. Gel line has internal pipe going toward back of tank to each compartment to allow rolling of tank.
- Integral Jost hydraulic lift cylinders allow raising/lowering of tank. Solar power eliminates need for diesel engine on tank
- All tank seams double welded (on both sides) and continuous
- Stairs and platform at front of tank - positioned to allow operator to see inside top roof hatch
- Sight gauge level indicators at side or front of tank
- Standard 2" ADR kingpin with 3/8" minimum king pin plate
- Internal coating Carboline 859 (white or light tan colour). Coating compatible with normal frac fluids.
- All valves to be FMC/Weco style valves, model 12 or 12N, with PTFE/Viton B seals, and nylon coated gate, and other trim standard. Valve handles with locking detents at 90 degrees included.

Safety Features

- Road registered and fully Australian ADR compliant design
- Australian compliant stairs with extendable handrails

Options

- Dual compartment mobile tanks with separate discharge manifolds and gun lines available
- Associated hoses and transfer pumps available
- High volume Frac Ponds for large volume jobs available

Oilfield Rental Solutions

One Company | One Complete Fluid Solution

Fluid Storage & Management

- Mobile & Skidded Frac Tanks
- Frac Ponds
- Mobile Flowback Tanks
- DST Tanks
- DFIT Tanks
- Agitator Tanks
- Acid Tanks
- Dual Skin Tanks
- Transfer Pumps & Hoses
- Vacuum Trucks & Fluid Transport

Drilling & Completion

- Mud Pumps
- Drill Pipe
- Pipe Bins
- Well-Test Equipment
- Flowback Iron
- Flare Tanks

Site Infrastructure & Service

- Spill Containment Equipment
- Potable Water Storage
- Non-Potable Water Storage
- Trailer Mounted Toilets
